

Optimize Operations with Powerful, Intuitive Management Reports

NextBus management reports provide transit executives and supervisors a set of powerful tools to manage their fleet. With these tools, managers get reports on the activities and performance of a single vehicle or route or multiple vehicles and routes selected by the manager. All are easily accessible over the Internet.

The reports are simple to use and provide essential management information, including details on vehicle headways and timepoint schedule adherence.

Management reports are essential for understanding where, why, and how problems are occurring in the system. This knowledge gives dispatchers and supervisors insight into ways to better distribute their resources and results in smoother system operations.

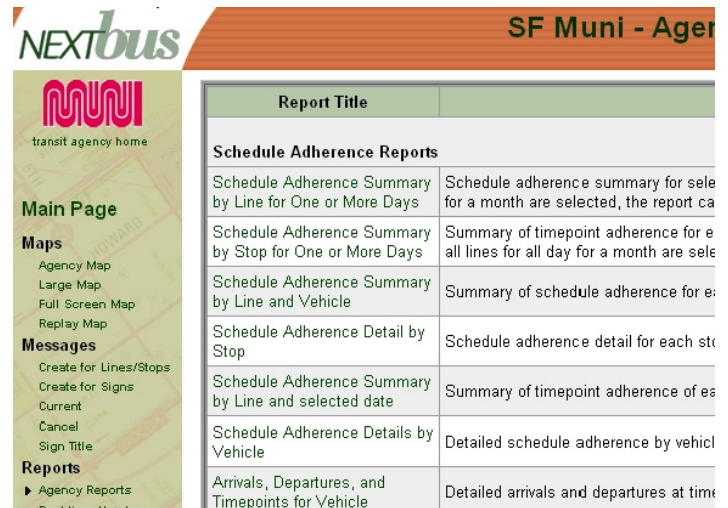

NextBus management reports are available 24 hours a day, seven days a week, providing up-to-the-minute information. Data is stored indefinitely so that valuable reports comparing current and archived data can be created and analyzed.

NextBus standard reports cover most of the information required for managing headway and schedule adherence, from a list of vehicles running and job scheduling, to more complex reports covering details of individual vehicle runs timepoint adherence, and others.

Standard NextBus management reports will enable you to improve:

- Schedule adherence
- Headway management
- Missed blocks
- Vehicle reporting
- Bus operator performance

Performance measurement becomes an easier task with the right set of tools. NextBus management reports provide information you need to optimize your transit operations.

More than 2 minutes ahead colored **Early**
 More than 4 minutes behind colored **Late**
